

About Me

Hi, I'm Hou-Tai, a fullstack developer. Working in a fast paced agency environment for 2+ years has made me even more passionate and enthusiastic about development. I'm hardworking, self-driven developer who is interested in seeking new development opportunities where I can share my knowledge and learn from others.

- Experience
- Julia Balfour LLC, Developer, East Haddam, Connecticut

September 2016 - Present

 - Communicated via email or phone to provide web solutions and develop websites and web applications based on client needs.
 - Successfully implemented and created websites and web applications based on client needs using PHP, Javascript, Node, Ruby on Rails for back-end development and React, HTML5, CSS, Ajax, JQuery for front-end development.
 - Launch sites using different hosting providers and set up servers and set up deployment processes for wordpress sites using AWS or Jenkins.
 - Managed, maintained and updated existing websites for clients and provide support.
 - Collaborate with a team of developers, content strategists and designers to create new looks and styles for notable web presence.
 - Ensure all sites follow W3C standards and are mobile friendly as well as utilizing all best practices for web development.
 - Implement SEO strategies across websites including blogs, ads and email marketing campaigns.
 - Design and develop automated and email newsletters for clients. Making sure they work across all email clients including outlook.
